#### CHARLESTON or LARGE WAKEFIELD

71 days. Desirable for home and market garden. Head broad heart-shaped, 8 inches broad at base, firm, commonly weighing 4 to 5 pounds. Fully a week later; heads larger and broader heart-shaped than Early Jersey Wakefield.

#### COPENHAGEN MARKET

A fine Cabbage. This variety is nearly as early as Jersey Wakefield. The stem is short, and the large, round, solid head has few outer leaves. My stock of this popular variety is extra early, uniform and dependable. A round head, weighing 3 to 3½ pounds, produces headed Cabbage 70 days after plants are set out.

#### FERRY'S ROUND DUTCH

71 days. Splendid for home and market garden. Plants small and compact; stem short. Heads almost ball-shaped, commonly 7 to 8 inches in diameter and 6 inches deep, weighing 4½ to 5 pounds. Firm and of high quality. Slow to produce "seeders."

FOR INSTRUCTIONS ON PLANTING, SPRAYING AND CULTIVATING OF CABBAGE AND COLLARD PLANTS TURN TO PAGE 4.

**TURN TO PAGE 15 FOR YOUR DUST AND DUSTER NEEDS**

#### 41 YEARS OF SATISFACTORY SERVICE

We guarantee all of our plants to be exactly as described in this catalog. Fresh pulled day order is received (where weather will permit). Plants pulled approximately 50 to bundle and packed to carry to your home in good condition. Any plants arriving in bad condition will be reshipped at once, provided you notify us within five days. When you purchase Fulwood's plants you will receive full count, no runts, no diseased plants, and you will receive the exact varieties ordered.

We send you only the highest quality plants and gladly stand back of them. However, weather, soil, and care also influence crops, so in no case shall we be responsible for any amount beyond the purchase price.

# FULWOODS FRCST PROOF CABBAGE PLANTS

**READY**  
Sept. 1 to June 15

**GLORY OF ENKHUIZEN**

80 days. Attractive, round, solid heads, 7 to 8 in. in diameter, and weighing from 5 to 6 lbs. each. They are exceptionally firm and solid. Leaves are finely ribbed, exceedingly tender and of remarkably fine flavor. Makes excellent kraut, slaw, etc.

**GOLDEN ACRE**

62 to 64 days. The earliest round-headed Cabbage, especially valuable for early market and shipping. Plants very small and compact; stem short; heads uniformly round, firm, commonly 6 inches in diameter and weighing 3 pounds. This is similar to Copenhagen Market but is several days earlier and the heads are smaller. It is practically as early as Early Jersey Wakefield.

**SAVE MONEY**—Note our new low prices on all varieties of Cabbage Plants

## **CULTURE — CABBAGE, COLLARD AND BROCCOLI PLANTS**

These are frost-proof plants and should stand a temperature of 20 degrees or below. Requires about 12 thousand plants to plant one acre and use from one to two thousand pounds of 4-8-6 fertilizer to an acre. Plant in 3 ft. rows, from fourteen to twenty-four inches in the drill. They should be planted up to the bud, but do not cover the bud. Water and press the soil firmly around the plants. Use Sabadilla dust for control of Harlequin bugs. Use five per cent DDT Dust for all types of Cabbage worms.

**MARION MARKET**

This is also offered as Wisconsin Copenhagen and is a very important midseason yellows-resistant variety for kraut manufacture and market. This variety has prominent globular heads which approach those of Glory of Enkhuizen in size, and it produces a heavy yield on yellows-infested soil where ordinary varieties fail. Matures heads 70 days after plants are set out. Somewhat larger head than Copenhagen, but the same shape.

**WISCONSIN ALL-SEASON**

This is a yellows-resistant strain developed at the Wisconsin Experiment Station by selection of healthy plants of standard All-Season grown on infested land. Wisconsin All-Season is a very valuable, heavily productive, hard-headed variety of particular merit for use in yellows-infested localities, and it is well adapted for kraut and for winter use. Makes heads in 85 days, weighing 6 to 8 pounds.

FOLD BACK • SAVE FOR FUTURE REFERENCE • FROST-PROOF ONION, CAULIFLOWER AND COLLARD PLANTS ON BACK OF THIS PAGE

### Culture—Onion Plants

These are frost-proof and can stand temperature below twenty degrees. Plant approximately sixty thousand plants to an acre in 1½ ft. rows, three to four inches in the drill and about two inches deep. Water and press soil tightly around plants. Dust with 5% DDT for thrips.

### Crystal Wax Bermuda

Probably the best-selling Bermuda Onion on the market, because of its exceptionally attractive appearance. It looks much like the Yellow Bermuda except that it is crystal white and waxy. Because of its sweet, mild flavor, like the Yellow Bermuda, this is an excellent eating Onion.

## FULWOOD'S ONION PLANTS

GENUINE FROST PROOF

Ready Sept. 1 to June 1

Southern-grown Onion plants are no longer an experiment. Large quantities are set out every year and they are rapidly displacing sets. They will grow large, sweet Onions early, and are good keepers. They produce Onions two to three times larger than sets, and seldom run to seed. They can be set early, the same time you would put out sets or cabbage plants. Therefore, we strongly advise you to use our plants instead of sets, whether for the market or home use. Our Onion plants are grown from the very best seed, and will be found true to name. These Onion plants should be set out at the same time as cabbage plants, and you can order them for shipment at the same time.

Most Onion plant growers pull Onion plants ahead and store them several weeks before shipping. Such plants cannot produce good crops. Our plants are fresh pulled and shipped the same day and produce better crops.

**SAVE MONEY—Note our new low prices on all varieties of Onion Plants**

### PRICES

Onion Plants are tied 100 to a bunch. Shipping weight is 7 lbs. to the 1,000 plants.

PARCEL POST PREPAID		EXPRESS — COLLECT	
200 for.....	\$ .75	1,000 to 4,000.....	\$1.50 per 1,000

Orders of 2,000 or more plants shipped by Express will give you better satisfaction than if shipped by mail.

Telephone Day 293 — Night 678-J

Write for prices on lots of a hundred thousand or more

### Sweet Spanish

The best of the very large mild varieties. One of the original Spanish types, but a better keeper because it was selected for keeping qualities. Deep amber-orange; small neck; globular.

### Yellow Bermuda

This is the most widely planted of all Bermuda Onions. No sweeter Onion is grown than this, and it always has a ready market. It is a large producer and a real money-maker. Whether grown for marketing or for your own table, you can make no mistake in ordering this variety.

## EARLY SNOWBALL CAULIFLOWER

Best and most widely used variety. Our Cauliflower plants are hardy and may be set earlier than home-grown plants.

Ready

January 1st

### CULTURE—CAULIFLOWER PLANTS

These are frost-proof and can stand temperature of twenty degrees. Plant approximately ten thousand plants per acre and be sure to plant so they will head in cool weather as they will not head properly in hot weather. Plant in 3 ft. rows, eighteen inches in drill. Dust same as for Cabbage Plants.

### PRICES

Write for prices on lots of one hundred thousand or more

## GEORGIA COLLARD PLANTS

These are very much like Cabbage plants. They grow from 2 to 3 feet tall, with light green, tender leaves on long stems. They withstand heat and have an excellent flavor when cooked. I have a good supply on hand the year round and can make prompt shipments at the same price as Cabbage.

Collards can be planted in fall and spring. Not in winter as they go to seed.

### PRICES

Prices on Collard Plants are the same by Express and Parcel Post as the prices on Cabbage Plants

## FULWOOD'S LETTUCE PLANTS

*Ready January 1st Till June 1st*

**GREAT LAKES**—One of the most satisfactory strains of the Imperial type yet introduced. Plant large and vigorous; head of good size and attractive color. Is resistant to tip burn and stands up well in hot weather.

### CULTURE — LETTUCE PLANTS

Will stand twenty degrees. Makes head in approximately 65 to 70 days. Use very rich soil and plant in 2 ft. rows, 12 inches apart. Takes about twenty thousand plants to plant an acre. Should put a light application of nitrate of soda after the plants have reached some size. Has no insects or diseases.

## FULWOOD'S BEET PLANTS

*Ready January 1st Till June 1st*

**Crosby's Early Egyptian.** This is probably the most popular Beet grown. I specialize in this one variety because it is the finest all-round home-garden and market Beet, and can be grown in all localities successfully. Have an extra-early crop by ordering these plants.

### CULTURE — BEET PLANTS

Frost-proof and will stand a temperature of twenty degrees or below. Plant in 3 ft. rows about six inches apart and use approximately thirty thousand plants to an acre. Beets are easy to grow and are not seriously affected by insects or diseases.

DO NOT TEAR OFF • FOLD BACK • SWEET POTATO SEED AND PLANTS ON BACK OF THIS PAGE

# FULWOOD'S IMPROVED BUNCH PORTO RICO SEED SWEET POTATOES AND PORTO RICO SWEET POTATO PLANTS

## BUNCH PORTO RICO SWEET POTATO SEED

Ready Jan. 1st to May 1st

Our new Bunch Porto Rico Sweet Potato Seeds are State Inspected, free from disease and certified for shipping to all parts of the country.

This variety, over a five-year period, was tested out by the Georgia Coastal Plain Experiment Station here at Tifton. It has no vines, but grows straight up, making cultivation easier as there are no vines to turn and they are easier to dig for the same reason. They are easy to make live and produce a marketable crop of potatoes about three weeks earlier than the regular vine Porto Rico.

The Georgia Coastal Plain Experiment Station here at Tifton produced 747.38 bushels of Bunch Porto Rico Sweet Potatoes on a measured acre in 1948 under ideal growing conditions. They will produce about 63 bushels per acre more of marketable potatoes than the vine potatoes and will run about 90% U. S. grade No. 1. The Bunch Porto Rico Sweet Potato is a short, "chunky," Copper Skin potato with a red meat and has an exceptionally high sugar content and is excellent for table use. This potato keeps better than most potatoes and in a very short time will be the leading potato grown throughout the South.

If you prefer to bed your own potatoes and grow your own plants we can furnish you the Seed Potatoes at **\$5.00 per bushel, F. O. B. Tifton** by Express or Freight. These Seed Potatoes are shipped in bushel crates and shipment can be made at any time up to April 1st. After that time we will bed all seeds not sold. We highly recommend that you plant some of these Bunch Porto Rico Sweet Potatoes.

## INSTRUCTIONS FOR BEDDING FULWOOD'S IMPROVED BUNCH PORTO RICO SWEET POTATOES

One bushel of potatoes should pull one thousand plants each pulling for about three consecutive pullings. Choose a well-drained piece of soil on the south side of a building where the sun can hit it all day. Mix approximately three pounds of commercial fertilizer to each square yard of dirt. Place the potatoes far enough apart that they do not touch and cover them with some three to four inches of soil. Keep them moist but not too wet as excessive water makes them cold. You should get your first pulling in approximately six weeks, depending on the weather.

If you desire to make a hot bed for extra early plants write the Georgia Agricultural Extension Service, University of Georgia, at Athens, Georgia, for bulletin No. 533.

## CULTURE — BUNCH PORTO RICO SWEET POTATO PLANTS

They should be planted after danger of frost. Use about 800 to 1,000 pounds of 4-8-8 per acre. Plant in 3½-foot rows, 12 inches to the drill, and use approximately twelve thousand plants to plant an acre. They should be on a six- or eight-inch bed. These Bunch Porto Rico Sweet Potato Plants can be cultivated without turning vines and they can be dug without having to cut vines, thus saving about fifty per cent of the labor. Follow crop rotation.

See page 15 for dust and dusters

Dear Sirs:

I am enclosing you an order for one bushel of your Fulwood's Improved Bunch Porto Rico Sweet Potato Seed for bedding. I tried a few of your plants of this variety last Spring and I liked them so well that I am ordering a bushel of seed potatoes to bed. They are grand potatoes and I think they are everything that you claim for them and more. Would like for you to ship the bushel as soon as you can.

RUSSELL HUGHES

Cuyahoga Falls, Ohio

Dear Sirs:

Your tomatoes I got from you were simply swell and they were wonderful plants. Don't forget to send me your price list next spring.

100 lbs. .... \$10.00

NOTE: We advise shipment by Express in lots of 100 lbs. or more.

SEND ALL ORDERS TO TIFTON, GEORGIA, AND THEY WILL RECEIVE OUR PROMPT ATTENTION.

**PLANTING NOTES:** When plants arrive, if your ground is not in condition to plant right away, take the plants out of the crate, cut the bands, spread out and place the roots in soft mud. In planting, pack soil well around the roots, pouring water in the hole after the plants are set out. Throw loose dirt around the plants after watering to keep the wet soil from drying out. Use chart for proper spacing.

## DUSTERS

### HUDSON

#### SIGNAL

Price,  
Delivered  
Anywhere  
**50c**

*Write for prices on lots of a hundred thousand or more*

My Tomato plants, grown on new land from Certified seed, are certified by the State of Georgia. I grow each season four hundred acres of Tomato plants. They are grown in the open field and when shipped are 8 to 10 inches tall; they are field hardened, stocky, and well rooted. Each bundle of 50 is wrapped with paper to hold the damp moss to the roots. They are then packed in special hampers and shipped by express, and will keep in good condition six to ten days. These plants are not frost-proof and should not be planted until danger of frost is over.

The fact that the seed is planted here in February and March gives the plants a chance to become acclimated and toughened by outside temperatures. When set farther North they will start growing quickly and produce rich, red, ripe Tomatoes three weeks before home-grown or hothouse plants. I ship these plants to every part of the United States, and have been shipping large quantities to market gardeners and truckers for 40 years. Van Camp Packing Co., of Indianapolis, Ind., uses ten million of my Tomato plants every season. Send me your order for some of these fine plants. You will be more than pleased with the early profitable crop they will produce.

**VALIANT** Adapted to short-season areas and the early market. Plant sparse and open; fruits large for an early variety, globe shaped and of bright scarlet color.

**MARGLOBE** is a splendid type for earliness and uniformity. It is particularly valuable for shipping; definite disease-resistance recommends it for use in sections infested with fusarium wilt and nail-head rust. Plants thrifty and heavily productive bearing over a long period. Fruits uniform deep scarlet, large, globe shaped; smooth, solid and of distinct quality.

**RUTGERS** An excellent all-purpose variety of wide adaptation. Plant large and prolific with thick stems and vigorous growth; partially resistant to Fusarium wilt. Fruits globular, bright red, smooth, with thick walls and small seed cells.

**PRITCHARD (SCARLET TOPPER)** is a very promising, heavily productive wilt-resistant variety for home and market garden, shipping and canning. Fruit large, globe shaped, scarlet and well colored about the stem end; flesh firm and of fine quality.

*A bundle of 50 Tomato Plants ready to be shipped.*

**GREATER BALTIMORE** is similar to Stone, heavily productive and very valuable for canning. The large, scarlet-red fruits commonly weigh 6 ounces; they are deep but flat, smooth, very firm and solid.

**CULTURE—TOMATO PLANTS.** Will not stand any frost. Should be planted in 4 foot rows, thirty-six inches apart and use about 3,500 plants to an acre. They should be planted up to the first heavy stem or leaf. For tomato bugs, fungus and bacterial diseases use 7% Metallic Tri-basic Copper Sulphate with 20% Calcium Arsenate dust and use about fifteen to twenty pounds per acre.

Anyone wishing to contract for Cabbage or Tomato Plants in lots of half million or more and be assured of getting your plants at a particular time, write us at our Tifton Georgia farm for special prices.
